a printed wiring board;

a first wiring layer and a second wiring layer ~~over~~ on the printed wiring board;

a first semiconductor element using a crystalline semiconductor film as a first active region and a second semiconductor element using an amorphous semiconductor film as a second active region over an adhesive;

a third wiring layer connecting the first semiconductor element and electrically connecting to the first wiring layer; and

a fourth wiring layer connecting the second semiconductor element and electrically connecting to the second wiring layer;

wherein the amorphous semiconductor film is located above the crystalline semiconductor film.

Claim 18, amend the claim so that it reads:

18. (Currently Amended) An electronic device comprising:

a printed wiring board;

a first wiring layer and a second wiring layer ~~over~~ on the printed wiring board;
